Privacy in apps

Apps by Genkgo gather the following information:

1. Analytical information, used to keep user statistics of the app.

Data gathered by external sources

Clients can add external sources to their own app. Frequently used external sources are Google, YouTube, Vimeo, Twitter and Facebook for ‘share’ buttons, videos etc.

These external sources may use additional cookies. These are ‘third party’ cookies. Genkgo does not have any influence on these cookies. *To identify the cookies used by external sources, please consult the relevant party.*

Data gathered by stores

When publishing apps in the Apple and Google stores, you need to keep in mind that these stores will also gather information via the app, a process which Genkgo cannot influence.
